

Distributed Biological Observatory (DBO)

Linking Physics & Biology in the Arctic

The Distributed Biological Observatory (DBO): 2014 Updates of Activities and Data Workshops

Jacqueline M. Grebmeier

Chesapeake Biological Laboratory

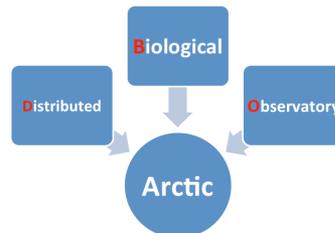

University of Maryland Center for Environmental Science, Solomons, MD, USA

Pacific Arctic Group

October 28-29, 2014

PMEL/NOAA

Seattle, Washington, USA

<http://www.arctic.noaa.gov/dbo/>

DBO UPDATE OUTLINE

- Introduction of agenda 2nd DBO data workshop, Oct 29-31, 2014
- Brief highlight science findings from the DBO pilot program 2010-2014
- Establishing new DBO lines in Beaufort Sea, NW Chukchi Sea, N Barents Sea
 - Beaufort Sea region (Jackie Grebmeier)
 - NW Chukchi Sea (Kathy Crane/RUSALCA)
 - Northern Barents Sea (Lis Lindal Jørgensen, Institute of Marine Research, Tromsø, Norway)
- DBO AXIOM workspace and EOL archive, DBO and PAG data metadata policy
- Plans for DBO publications and 2015 field activities
- Future Earth Science Cluster Network update (Sue Moore)

2nd DBO DATA WORKSHOP BRIEF AGENDA

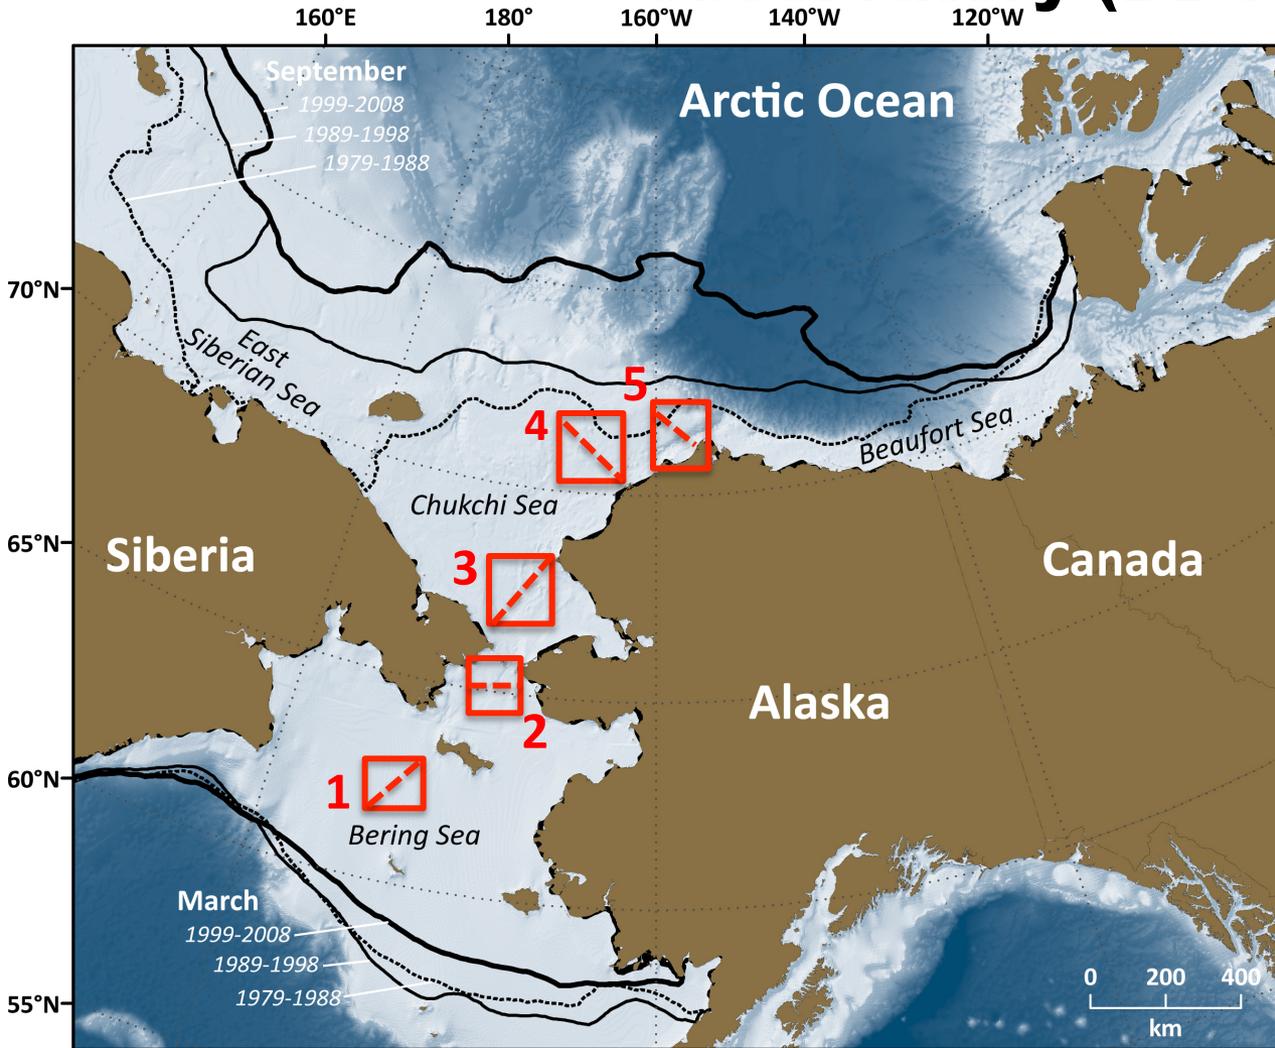

29 October (1:30 pm)-31 October (3 pm) 2014

PMEL/NOAA, Seattle, Washington, USA

Workshop Overview: We have 4 objectives for this workshop:

1. Present results from the 2010-2014 DBO field program and determine a basis for multidisciplinary papers to showcase results of the DBO international effort,
2. Evaluate the DBO data submission effort through the AOOS-DBO data workspace, EOL open data site, and discuss linkage to national archives,
3. Determine the location of new DBO transect lines in the Beaufort Sea, western Chukchi Sea, and discuss possible pan-Arctic lines, such as in the northern Barents Sea, and
4. Discuss a plan for full implementation for the DBO relative to IARPC and PAG goals

Linking Physics to Biology: the Distributed Biological Observatory (DBO)

[modified by Karen Frey from Grebmeier et al. 2010, EOS 91]

- DBO sites (red boxes) are regional “hotspot” transect lines and stations located along a latitudinal gradient
- DBO sites are considered to exhibit high productivity, biodiversity, and overall rates of change
- DBO sites will serve as a change detection array for the identification and consistent monitoring of biophysical responses
- Sites occupied by national and international entities with shared data plan

2014 DBO Field Season: Sampling Contributors (as of October 21_2014)

Region Key: DBO1=So. St. Lawrence Is., DBO2=Chirikov Basin, DBO3=So Chukchi Sea, DBO4=NE Chukchi Sea, DBO5=Barrow Canyon.

Dates (Port calls)	Ship	DBO Region	Projects	PAG contact	Chief Scientist
June 30-July 7 (Nome-Nome)	Norseman 2	3	Bering Strait Mooring Project/AON	Rebecca Woodgate woodgate@apl.washington.edu	Rebecca Woodgate woodgate@apl.washington.edu
July 8-17 (Anadyr-Anadyr)	Khromov	3	RUSALCA Bering Strait mooring	Kathy.Crane@noaa.gov Phyllis.Stabeno@noaa.gov	Kathy.Crane@noaa.gov
July 4-23 (Victoria, BC-Barrow)	Sir Wilfrid Laurier	1,2,3,4,5; + moorings at 3 and 5	C30/DBO, plus JAMSTEC DBO moorings	Jackie Grebmeier jgrebmei@umces.edu ; Takashi Kikuchi takashik@jamstec.go.jp	Svein.Vagle@dfo-mpo.gc.ca

Aug 30-Sept 12 (Dutch-Nome)	Alaska Endeavor	2	BASIS	Ed.Farley@noaa.gov	jim.murphy@noaa.gov
Sept 21-Oct 14 (Dutch-Kodiak)	Oscar Dyson	1	BASIS	Ed Farley : ed.farley@noaa.gov	Lisa Eisner : lisa.eisner@noaa.gov
September 9-25 (Barrow-Kugluktuk)	Amundsen	5	ArcticNet	Martin.Fortier@arcticnet.ulaval.ca Keith.Levesque@arcticnet.ulaval.ca	Louis.Fortier@bio.ulaval.ca

Projects Key: AON=US Arctic Observing Network; ARCWEST = Arctic Whale Ecology Study; BASIS=Bering Arctic Subarctic Integrated Survey COMIDA=Chukchi Offshore Monitoring in Drilling Area; CSESP=Chukchi Sea Environmental Studies Program; C30=Canada's Three Oceans; JAMSTEC= Japan Agency for Marine-Earth Science and Technology; KOPRI = Korea Polar Research Institute.

Distributed Biological Observatory Standardized Sampling Protocols

Core ship-based sampling:

- CTD and ADCP
- Chlorophyll
- Nutrients
- Ice algae/Phytoplankton (size, biomass and composition)
- Zooplankton (size, biomass and composition)
- Benthos (size, biomass and composition)
- Seabird surveys (standard transects)
- Marine mammal surveys (standard transects)

Second tier ship-based sampling:

- Fishery acoustics (less effort than standardized bottom trawling)
- Bottom trawling (every 3-5 years)

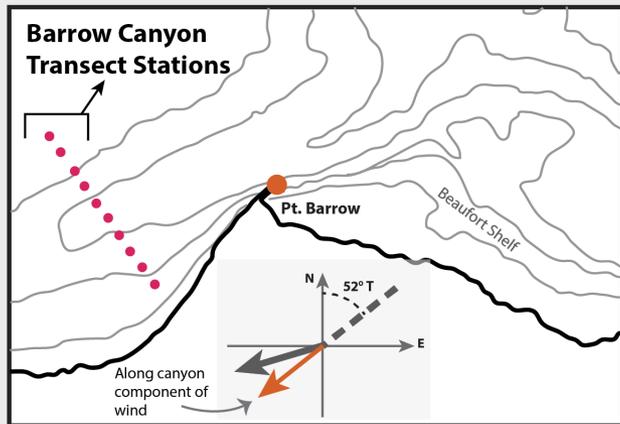

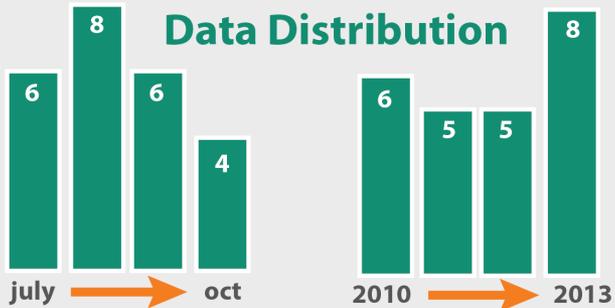

DBO sampling by national & international science programs

DBO line 5 Barrow Canyon

24 occupations

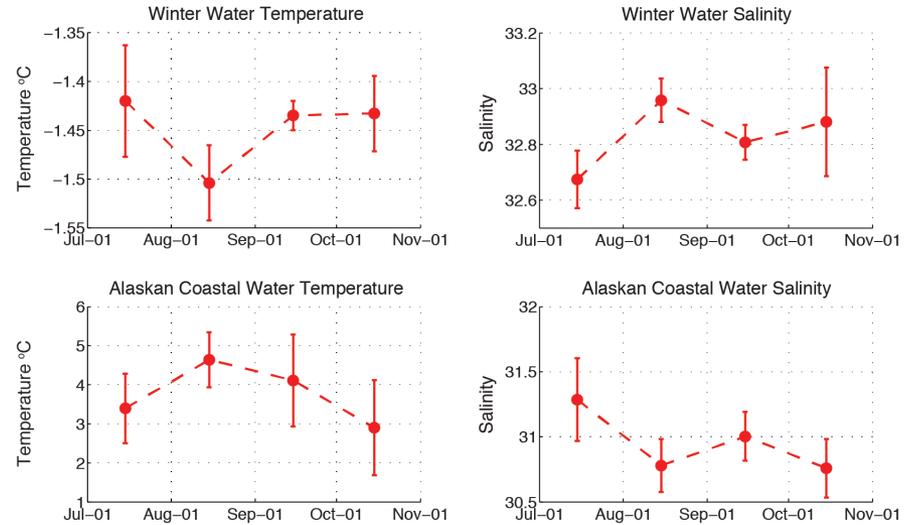

11 chief scientists

202 total CTD casts

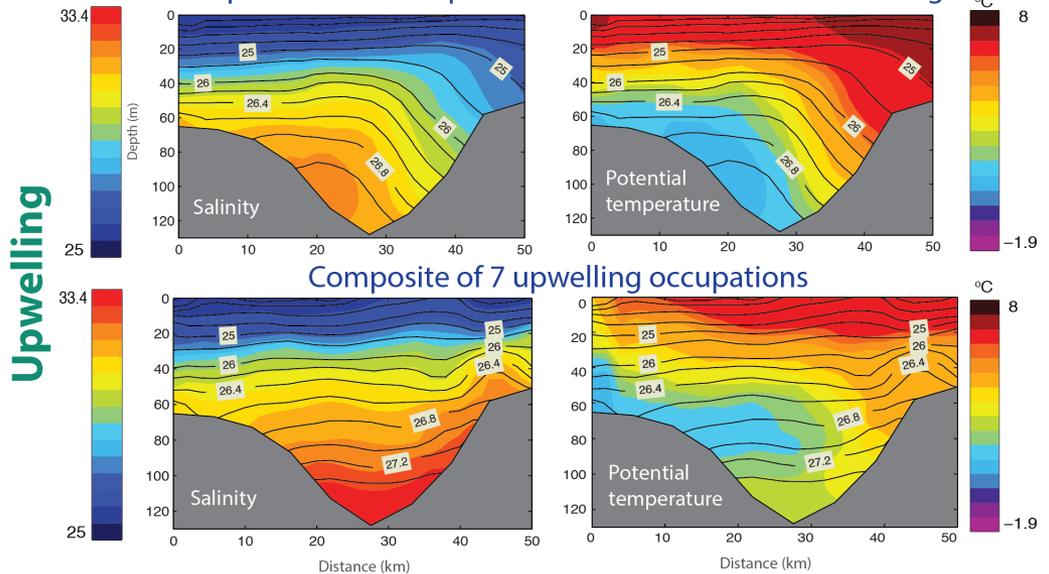

Monthly mean water mass properties in the absence of wind forcing

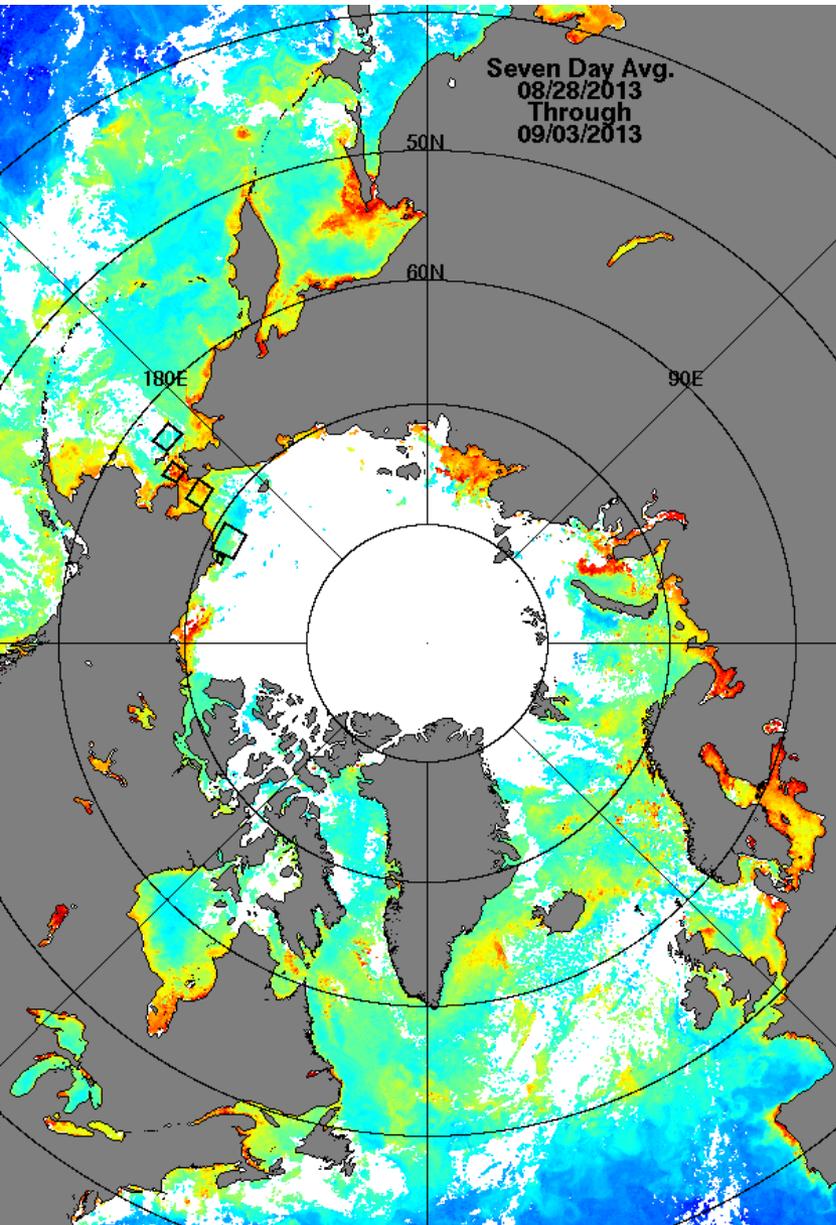

Seasonality

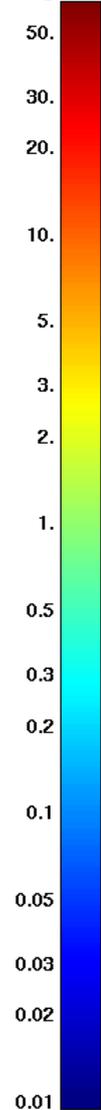

Composite of 16 occupations in the absence of wind forcing

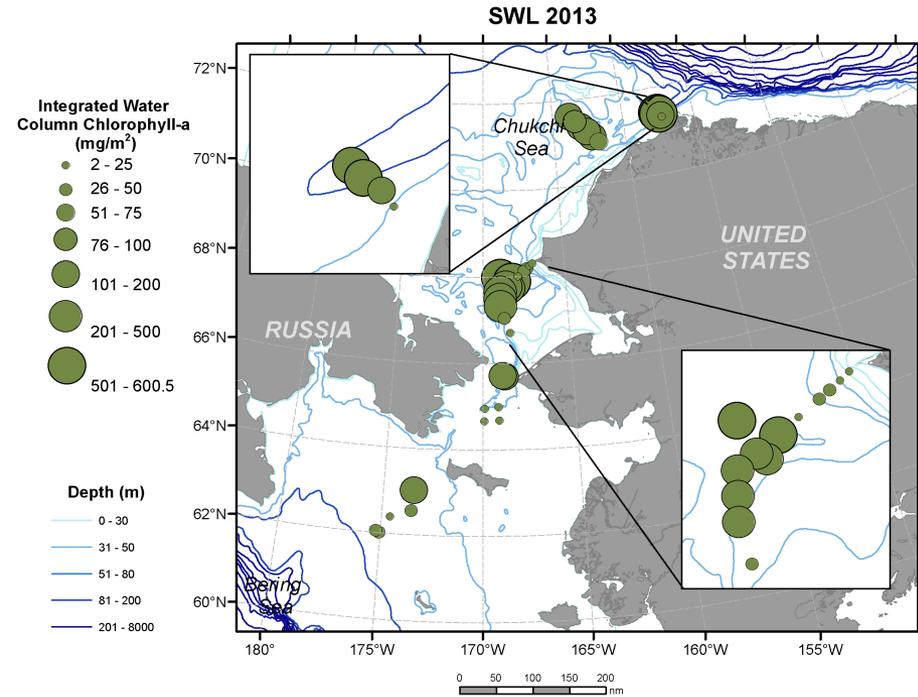

NASA DBO-surface chlorophyll and field collected integrated values

Chlorophyll
mg/m³

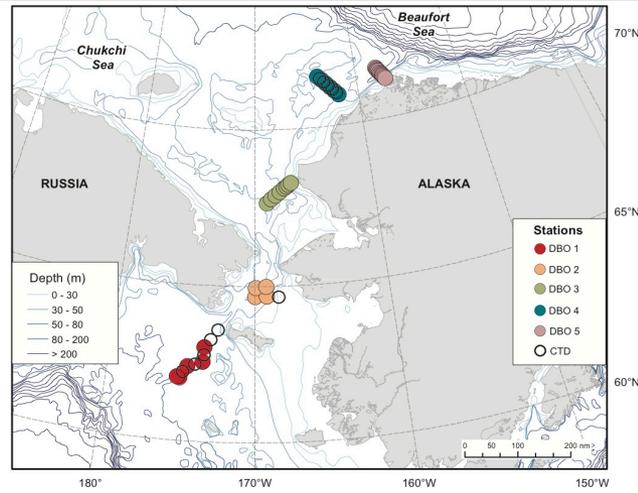

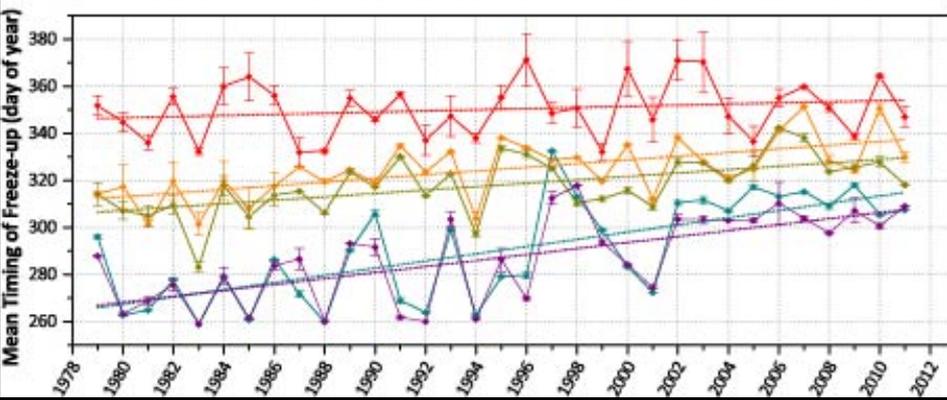

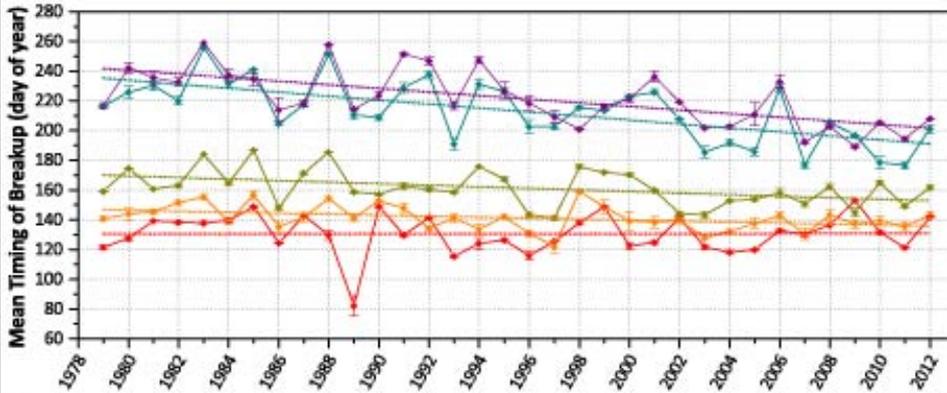

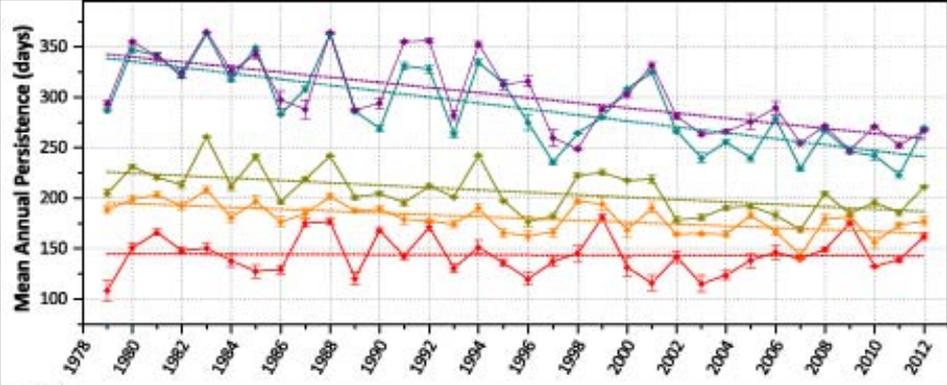

Sep 4, 2013

Distributed Biological Observatory

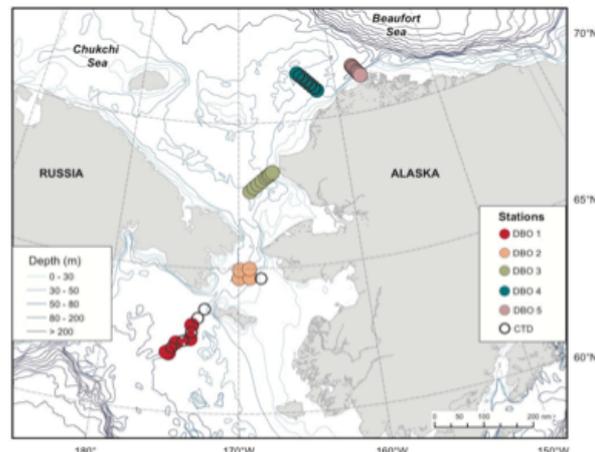

A Data Archive Linking Physics & Biology

NEW! Submit Data

Welcome to the Distributed Biological Observatory Data Archive!

The data archive for the Distributed Biological Observatory (DBO) is envisioned as a change detection array along a latitudinal gradient extending from the northern Bering Sea to the Barrow Arc. DBO sampling is focused on transects centered on locations of high productivity, biodiversity and rates of biological change. The DBO sampling framework was initially tested during the successful 2010 Pilot Study, which consisted of international ship occupations of two of the DBO sites, one in the SE Chukchi Sea and one across upper Barrow Canyon. The DBO is specifically included in the draft US National Ocean Policy Strategic Plan. In addition, the Marine Working Group of the International Arctic Science Committee (IASC) has endorsed the DBO and is supporting similar activities in the Atlantic sector of the Arctic. The U.S. Interagency Arctic Research Policy Committee (IARPC), comprised of representatives from 13 Federal agencies, developed a five year plan (2013-2017) focused on seven research themes, with further development of the DBO included under the first theme: Sea ice and Marine Ecosystems.

The DBO IT is now focused on bringing together data from 2010-2013 sampling efforts, to demonstrate the value-added of this national and international, sampling shared-data approach to the investigation of biological responses to a rapidly changing Arctic marine ecosystem. Expanding from the Pacific Arctic sector, the DBO will also serve as a framework for international research coordination via the Arctic Council Circumpolar Biodiversity Monitoring Program (CBMP), and is recognized as a task of the pan-arctic Sustaining Arctic Observing Network (SAON) program.

The area of interest and specific station sites for the Distributed Biological Observatory.

ICSU Future Earth Initiative

FutureEarth has funded these organizations to **establish a research network and develop a proposal** re: Arctic/Polar matters (target: April 2015)

**International Interdisciplinary
Polar Science Network**
Lead PI: Faye McNeill (OASIS/AICI)

Participants: OASIS/AICI, BEPSII, ArcticNET, HitT, SVALI, CRAICC, DEFROST, ASP, SEARCH, SVALI, NORDFROST, WCRP/CLIC, WCRP/CLIVAR, AMAP, PEEX, DBO, ISAC

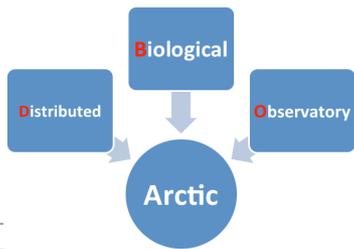

IGPB Core Projects: IGAC, SOLAS

**Circumpolar Arctic Coastal Communities
Observatory Network (CACCON)**
Lead PI: Don Forbes (LOICZ SSC)

Participants: LOICZ, IASC, ArcticNET, AACCA, IPA, ACD, IASSA, SliCA

Arctic Coasts: Changes and Governance
Lead PI: Ilan Chabay (KLSC, IASS, ESG)

Participants: ESG, KLSC, LOICZ, IASS
